

Social Media Toolkit – The Green Connection and Southern African Faith Communities' Environment Institute - Integrated Energy Plan Court Case

WE MUST ACT NOW

The Green Connection and the Southern African Faith Communities' Environment Institute (SAFCEI) have initiated a court case against President Cyril Ramaphosa to force him to bring Section 6 of the National Energy Act into operation, and for the Minister to develop an Integrated Energy Plan (IEP) in terms of that Section. We encourage environmental defenders and the public to support this court case, for a just and inclusive energy transition.

Environmental defenders @thegreenconnection and @SAFCEI have decided to force government to act on South African laws that enable development of the IEP on an annual basis for the country to deal with the current energy crisis.

The Integrated Energy Plan will drive the energy investment of the country by ensuring sustainable energy sources are added to the grid to meet our net-zero agreements and improve our economy.
